OXARD
ERP

Transform your Business with OXARD ERP Solutions

Simplify Your **Workflow** and Increase **Profitability**

Oxard ERP is a unique system that helps organizations of any size to integrate their total business processes for optimizing the resource management and automating the workflow. The ERP supports multi-company and multi-branch, where you can choose active modules for each company, add unlimited branches, and add group companies worldwide. Oxard ERP has an in-built workflow management system which assists organizations to control the business processes and reduce the paperwork. It supports role-based access to modules, with data level permission. The ERP also sends email notifications for expiry dates, approvals, scheduled interviews, payslips, etc. The ERP operates per Saudi labor laws and it's accredited by ZATCA.
